Work Experience

Front-End Development Jul 2022 - Present

Newtech Software

Newtech is a business process outsourcing company offering international software services. Our client focus on helping customer of all sizes build a digital presence with a platform that allows creating a personalized web site/ecommerce/blog with a set of tools that enable a world of possibilities to engage people into their business. The client mainly uses React along with C# to maintain their business running.

Responsibilities:

- Develop complex structures created by UI/UX team in conjunction with my colleagues.
- Offer insights on how to improve website functionality.
- Research on different technologies as NextJs to build new repositories from scratch.
- Present new features to be incorporated in the website before going live.
- Discuss action plans to complete desire requirements to meet the deadline.

Technologies/Tools

Technologies: React, NextJs, TypeScript.

Platform: Web.

Web / Blockchain Development Consultant**Apr 2020 – Jul 2022****Power Soft Solutions**

The client operates in the Solana blockchain, utilizing collectible NFTs as its main asset. Through the system, users can interact, create, buy, sell, and trade their own tokens, collect NFTs from our and/or different marketplaces while comparing prices, seeing transaction histories in the Solana blockchain, and filtering collections according to specified parameters.

Responsibilities:

- Collaborated with my peers to design, code, and debug.
- Analyzed client requirements to develop a desired marketplace.
- Converted mockups into optimized JSX files.
- Research and develop Solana blockchain technologies.
- Documented application changes and developed updates.

Technologies/Tools**Technologies:** JavaScript, React.**Platform:** Web.**Freelance Web Developer****2020 - Present**

Santo Domingo, Dominican Republic
