TECHNICAL PROJECTS

Appointment Scheduler- Github | Demo
Create and handle your customer appointments.
Skills - [React, Tailwind CSS, localStorage]
- Built a single page application that allows creating, editing and deleting customer appointments for a vet clinic.
- Utilized localStorage to store user information client-side.
- Implemented Tailwind CSS to develop the style of the whole application.

Track My Budget - Github | Demo
Set a budget and track your expenses to know where the money is going to.
Skills - [React, CSS]
- Created the application by using React as a necessity of understanding how was the money being expended.
- Styled the application with raw CSS.
- Utilized localStorage to keep track of the changes.

Crypto Exchange - Github | Demo
Application with the purpose of getting real time information of cryptocurrency values.
Skills - [React, Styled Components]
- Developed a cryptocurrency quote by integrating cryptocompare API to get the currencies information.
- Utilized styled components to create the UI.
- Created a hook to provide the options inside the select menu.

EXPERIENCE

Sales Executive, **Advensus**, Santo Domingo, Dominican Republic.

- Sell all sorts of products going from material handling equipment through office supplies to commercial industrial establishments.
- Acquire new customers and maintain relationships with sales departments to fulfill any possible requirement.
